SUPPLEMENTAL DECLARATION

We, as the below-named inventors, hereby declare that our residences, post office addresses, and citizenships are as stated below adjacent our names, that we verily believe we are the original, first and joint inventors of the invention described and claimed in Letters Patent No. 5,235,581, issued August 10, 1993, and in the specification filed August 5, 1991, and for which invention we solicit a reissue patent; that we have reviewed and understand the contents of the specification attached hereto, including the claims; that we acknowledge our duty to disclose information of which we are aware which is material to the examination of this Reissue Application in accordance with Title 37, Code of Federal Regulations, §1.56(a); and that no application for patent or inventor's certificate on this invention has been filed in any country foreign to the United States prior to filing of Application Serial No. 740,629 filed August 5, 1991 (from which Patent 5,235,581 issued) by us or our legal representatives or assigns, except as follows:

Japanese Patent Application Nos. 02-212537

filed August 9, 1990, 02-285006 filed

October 22, 1990, and 03-044798 filed

March 11, 1991.

The priority of Japanese application nos. 02-212537, 02-285006 and 03-044798 was claimed in said U.S. application and is also hereby claimed in this Reissue Application and certified copies are available in the patent file.

We further declare that we believe said Letters Patent is, through errors which arose without deceptive intent on the part of the applicants, wholly or partially inoperative by reason of claiming more or less than we had a right to claim in the patent. We hereby provide a statement of at least one error relied upon to support this reissue application, in that independent patent claims 1, 7 and 10 recite an objective lens for converging the light flux onto the optical disk, and independent patent claims 13, 16 and 19 recite plural converging grating couplers for emitting light supplied from light emitting means, whereas new independent claims 26, 28 and 34 cover subject matter not recited in the original claims and thus depart from the subject matter of the original claims in that new independent claims 26, 28 and 34 recite, *inter alia*, a composite optical converging device including a light

emitting means, a converging means and an optical wave front correcting means.

We hereby appoint the following as our attorneys of record with full power of substitution and revocation to prosecute this application and to transact all business in the Patent and Trademark Office.

James E. Ledbetter, Registration No. 28,732;
Thomas P. Pavelko, Registration No. 31,689; and
Anthony P. Venturino, Registration No. 31,674.

All correspondence in connection with this application should be sent to:

James E. Ledbetter, Esq.
STEVENS DAVIS, MILLER & MOSHER, L.L.P.

Facsimile: (202) 408-5200

We, as the undersigned inventors, further declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such

willful false statements may jeopardize the validity of the reissue application or of any reissue patent to issue thereon.
